

Fahmak Alena User Stories

Based on the Fahmak Alena System Analysis and Design Document, the following user stories have been identified. They are categorized by key roles and include acceptance criteria, priorities, and estimation points to guide the development process.

1. Role: Student

1.1. Account Management

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to register and log in to the platform using my email/password or social accounts (Google, Facebook), so that I can access learning content.	- The student must be able to successfully register using email and password - The student must be able to successfully register using a Google account - The student must be able to successfully register using a Facebook account - The student must be able to log in after successful registration - The student must receive a confirmation message after successful registration.	High	5
As a student, I want to manage my profile, including personal information, learning preferences, and notification settings, so that I can personalize my learning experience.	- The student must be able to update personal information (e.g., name, avatar) - The student must be able to modify learning preferences (e.g., preferred topics, learning style) - The student must be able to enable or disable notifications - Changes must be saved successfully.	Medium	3

1.2. AI-Powered Learning

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to receive personalized learning paths based on my initial assessment, progress, and learning style, so that I can learn more effectively.	- The system must generate a unique learning path after the initial assessment - The learning path must dynamically adapt based on the student's performance - The learning path must display content suitable for the student's learning style.	High	8

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to interact with an intelligent AI Chatbot for 24/7 support, to answer my questions, explain concepts, and provide additional resources, so that I can get immediate assistance.	- The student must be able to ask questions to the chatbot - The chatbot must provide accurate and relevant answers - The chatbot must be able to explain complex concepts - The chatbot must suggest additional learning resources when needed - The chatbot's response time must be less than 3 seconds.	High	8

1.3. Assessments & Quizzes

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to take adaptive assessments and quizzes whose difficulty dynamically adjusts based on my performance, so that I can accurately gauge my understanding.	- Question difficulty must change based on the student's previous answers - The system must provide an accurate assessment of the student's understanding level - The student must be able to review assessment results.	High	5
As a student, I want to receive automated feedback on my assignments and quizzes, so that I can understand my mistakes and improve my performance.	- The system must provide immediate feedback after completing an assignment/quiz - Feedback must be specific and actionable - Feedback must include error corrections and improvement guidance.	High	5

1.4. Gamification

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to earn Experience Points (XP) for completing lessons, quizzes, and courses, so that I can advance my overall level.	- The student must receive XP upon completing any learning activity - The student's current XP and level must be clearly displayed - Collecting XP must lead to leveling up the student.	Medium	3
As a student, I want to be awarded badges for achieving specific milestones or mastering certain topics, so that I can showcase my progress and achievements.	- Badges must be automatically awarded upon meeting specified criteria - The student must be able to view earned badges on their profile - Badges must be meaningful and motivating.	Medium	3
As a student, I want to see leaderboards to compare my progress with other students, so that I can be motivated and engage in friendly competition.	- The leaderboard must display student rankings based on XP or achievements - The leaderboard must be updated regularly - The student must be able to see their position on the leaderboard.	Low	2

1.5. Collaborative Learning

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to use a Peer Tutoring Matching System to connect with other students for collaborative learning, so that I can get additional help or assist others.	- The student must be able to search for peer tutors based on topics or skills - The student must be able to communicate with matched peers - The system must provide a mechanism for scheduling tutoring sessions.	Medium	5

1.6. Reports & Analytics

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to view detailed reports and analytics about my learning progress, so that I can track my performance and identify areas for improvement.	- Reports must display the student's progress in courses and lessons - Analytics must include the student's strengths and weaknesses - Reports must be easy to understand and visually appealing.	Medium	3

1.7. Immersive Learning (AR/VR)

User Story	Acceptance Criteria	Priority	Estimation Points
As a student, I want to access basic AR/VR integrated learning modules (e.g., 3D models, virtual labs), so that I can experience immersive learning.	- The system must provide access to at least one AR/VR module - The AR/VR module must function correctly and provide an immersive experience - The student must be able to interact with the AR/VR content.	Medium	8

2. Role: Instructor

2.1. Course & Content Management

User Story	Acceptance Criteria	Priority	Estimation Points
As an instructor, I want to create, edit, and publish courses, modules, and lessons, including various media types (text, video, audio, interactive simulations), so that I can deliver rich educational content.	- The instructor must be able to create a new course - The instructor must be able to add modules and lessons to a course - The system must support uploading various media types (video, audio, images, text) - The instructor must be able to edit published content - The instructor must be able to publish courses and lessons for students.	High	8

2.2. Student Monitoring & Assessment

User Story	Acceptance Criteria	Priority	Estimation Points
As an instructor, I want to use an instructor dashboard to monitor student progress, so that I can provide timely support.	- The dashboard must display each student's progress in courses and lessons - The instructor must be able to view student scores in assessments - The instructor must be able to identify students who are struggling.	High	5
As an instructor, I want to utilize robust cheating detection mechanisms for assessments, so that I can ensure the integrity of exams.	- The system must identify potential cheating instances during assessments - The instructor must be notified of suspected cheating cases - The system must provide evidence to support cheating detection.	High	8

2.3. Reports & Analytics

User Story	Acceptance Criteria	Priority	Estimation Points
As an instructor, I want to view detailed reports and analytics on student performance, so that I can evaluate teaching effectiveness and identify areas for improvement.	- Reports must display average student scores in courses - Analytics must include statistics on lesson completion and student engagement - Reports must be exportable.	Medium	3

3. Role: Administrator

3.1. System Management

User Story	Acceptance Criteria	Priority	Estimation Points
As an administrator, I want to access a dashboard to manage users, courses, subscriptions, and view system-wide analytics, so that I can effectively oversee the platform.	- The administrator must be able to add/edit/delete user accounts - The administrator must be able to manage courses and content - The administrator must be able to manage subscription plans - The dashboard must display key system performance metrics and analytics.	High	8

3.2. Subscription & Payment Management

User Story	Acceptance Criteria	Priority	Estimation Points
As an administrator, I want to support various subscription plans and securely process payments via integrated payment gateways, so that I can monetize the platform.	- The administrator must be able to create and modify subscription plans - Payments must be processed successfully and securely - All financial transactions must be logged - The administrator must be able to view revenue reports.	High	5

3.3. Reporting & Analytics

User Story	Acceptance Criteria	Priority	Estimation Points
As an administrator, I want to view comprehensive system-wide reports and analytics, so that I can make informed decisions regarding platform development.	- Reports must display platform usage statistics (e.g., active users, completed courses) - Analytics must include data on the performance of different features - Reports must be customizable and exportable.	High	5

4. Role: System (Non-Functional)

User Story	Acceptance Criteria	Priority	Estimation Points
As a system, I must ensure that UI response time is less than 2 seconds for 90% of user interactions, so that I provide a smooth user experience.	- The average UI response time must be less than 2 seconds - This target must be met for 90% of user interactions.	High	5

User Story	Acceptance Criteria	Priority	Estimation Points
As a system, I must ensure all sensitive data (e.g., passwords, payment info) is encrypted using AES-256, so that I protect user privacy and data security.	- All sensitive data must be encrypted at rest and in transit - AES-256 algorithm must be used for encryption.	High	8
As a system, I must support over 100,000 concurrent users with consistent performance, so that I can meet the needs of a growing user base.	- The system must maintain stable performance with 100,000 concurrent users - Frontend response time must not exceed 2 seconds under this load.	High	13
As a system, I must maintain 99.9% uptime (excluding planned maintenance), so that I ensure continuous platform availability.	- The system's monthly uptime must be 99.9% - Any unplanned outages must be reported.	High	8
As a system, I must implement Role-Based Access Control (RBAC) to ensure users only access authorized functionalities, so that I maintain security and data integrity.	- Access to features and data must be restricted based on user roles - Unauthorized access attempts must be logged and prevented.	High	5
As a system, I must perform daily automated data backups with a clear disaster recovery plan, so that I can ensure data reliability and business continuity.	- Daily automated backups of all critical data must be performed - A documented disaster recovery plan must be in place and tested periodically.	High	5
As a system, I must be fully responsive across all major devices and browsers, so that I provide a consistent user experience regardless of the access method.	- The web application must render correctly on desktop, tablet, and mobile devices - The web application must function correctly on Chrome, Firefox, Safari, and Edge.	High	5
